EDUCATION ABROAD IN
GLOBAL PUBLIC HEALTH

WHAT’S NEXT?
• Take the Education Abroad Workshop
• To discuss program options, make an appointment online with an education abroad advisor according to your country or region of interest.

BENEFITS OF AN INTERNATIONAL EXPERIENCE
For students in Global Public Health, an international experience can be an integral component to the discipline. Upon return from studying abroad, many students report that they are equipped with greater language proficiency, deeper knowledge and understanding of various cultures, as well as a broader, more global perspective that is often valued by employers.

ACADEMIC & TIMING CONSIDERATIONS
Depending on the program you enroll in, you may receive either direct or transfer credit for the courses you complete abroad. All students wishing to study abroad must have a GPA of 2.5 or higher, depending on the program. Planning ahead is key to finding a program that meets your academic and personal goals. The Global Public Health program and the International Studies Office recommend planning for your international experience as early as first year, and encourage you to meet with an education abroad advisor, as well as your academic advisor.

- Australia, UVA Exchange: University of Queensland
- New Zealand, UVA Exchange: University of Auckland

* Internship available
§ Fieldwork/field study available

Student Testimonial

“Public Health is more than just one’s well being and visits to the hospital. This trip so far has highlighted even more the need to address the social determinants of health and a community based model in order to efficiently, culturally, and effectively improve the health of a population...I am forever grateful for my experience in St. Kitts and Nevis because it shows me that there is good in the world and there is more work that needs to be done.”
- Shadelle Gregory, UVA in St. Kitts & Nevis: Public Health Sciences
