BENEFITS OF AN INTERNATIONAL EXPERIENCE

An international experience can be an integral component to your academic career. Upon return from studying abroad, many students report that they are equipped with greater language proficiency, deeper knowledge and understanding of various cultures, as well as a broader, more global perspective that is often valued by employers.

ACADEMIC & TIMING CONSIDERATIONS

Depending on the program you enroll in, you may receive either direct or transfer credit for the courses you complete abroad. All students wishing to study abroad must have a GPA of 2.5 or higher, depending on the program. Planning ahead is key to finding a program that meets your academic and personal goals. The International Studies Office recommends planning for your international experience as early as first year, and encourages you to meet with an education abroad advisor, as well as your academic advisor.

PROGRAMS

Review the Physics Department's Study Abroad Guide.

You can also use our Program Search to find programs offering coursework in Physics.

NOTE: Not all programs found in this search may be recommended by the department.
